Light Niche Mounting Plate Assembly

DL-3160A

For inground or semi-inground installation, this step must be done before you pour your concrete collar.

To install the full size light niche mounting plate assembly you must place the mounting plate on the inside of the pool. Light niche goes behind the mounting plate. Be sure to align the niche to the hole pattern on the mounting plate. Place 4 bolts through the pool and through the mounting brackets. Tighten nuts to a snug fit, but do no over tighten as this will damage the mounting plate.

Once the mounting plate assembly is complete, you can proceed to light installation.

Please refer to manufacturer's instructions for proper light installation.
